**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, are drawn to method of making a valve, classified in class 251, subclass 149.1.
  - II. Claims 11-45, are drawn to apparatus for insertion of a flexible medical device, classified in class 604, subclass 167.01.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process claimed can be used to make any valve not one specifically for allowing a flexible medical device to be pass through it and sealed around the device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
